In 1855 the Bessemer process made steel available in large quantities for the first time and paved the way for modern machinery and machine tools. R B & W, then ten years old, was in a position to contribute substantially to the ensuing wonders of production and construction by furnishing bolts, nuts and rivets necessary for the assembly of machines, structures and products.

Year by year since 1845, EMPIRE Brand Bolts, Nuts and Rivets have been improved, as new materials, machines and methods—perfected and adopted by R B & W—have made possible progressively higher standards of strength, uniformity and accuracy.

R B & W manufacture a complete line of threaded, upset and punched products including various types and finishes of Bolts, Nuts, Rivets, Washers, Screw Pins and Rods. R B & W EMPIRE products are the standard of industry.

Write for free booklet on Bolt, Nut and Rivet design.
Shows standard methods of designation in drafting.
Fits conveniently in drawing instrument case. 7104
